

Enable BAIDU MAP when running in HTTPS environment:

GOOGLE CHROME:

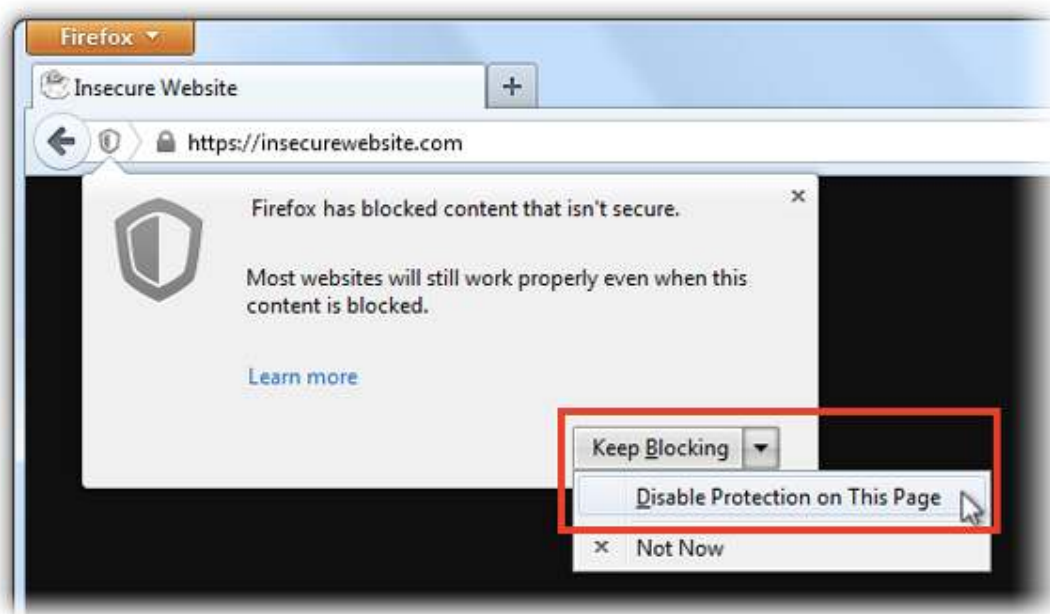

A shield icon will appear in the address bar when mixed content is blocked. To display the mixed content, click the shield icon, then click Load anyway or Load unsafe script.

Repeat this if necessary.

FIREFOX:

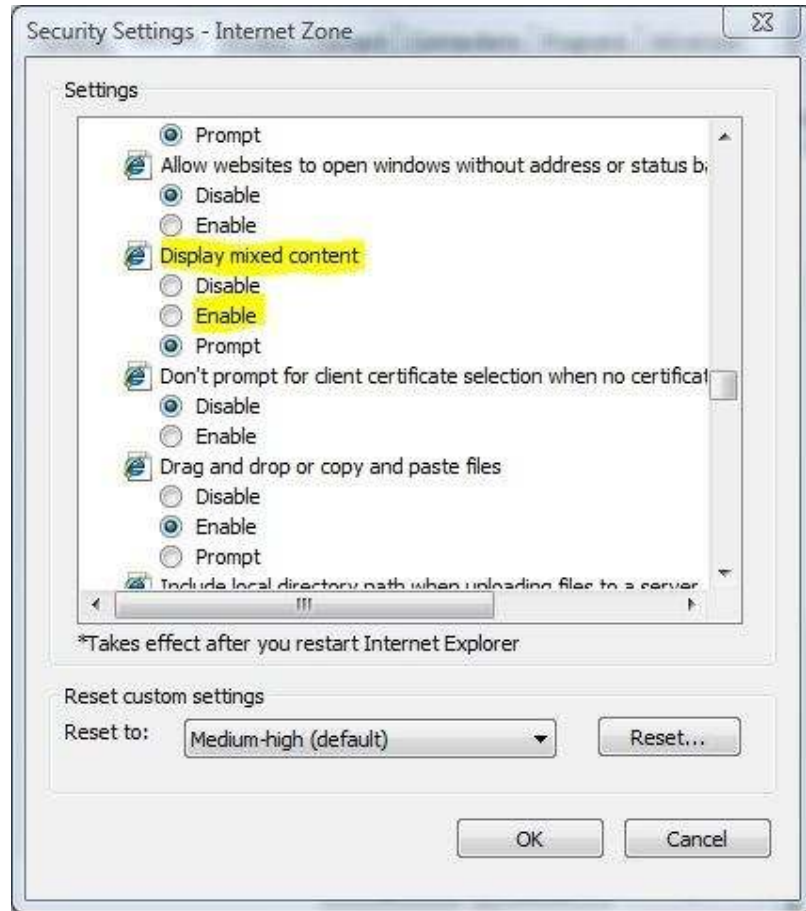

A shield icon will appear in the address bar (as shown below) when mixed content is blocked.

To display the mixed content, click the shield icon, then click Disable Protection on This Page in the menu that appears. Repeat this if necessary.

INTERNET EXPLORER:

Go to Internet Options > Security > Custom Level.
Find “Display Mixed Content” and enable it.

Then reload that page and it will prompt you a dialog. Click “Yes”
